Equipment questions

Q1: What does the monitor do?

A: It reports device status.

Q: Is backup available?

A: It depends on the selected model.

The explanation has three points.

1. The panel shows status.

2. The controller receives commands.

3. The battery supplies energy.

Summary: these roles remain separate.

Internal note: confirm the supported model before promising backup.

The controller checks compati
bility.
